SUMMARY

Results-driven **B.Tech Computer Engineering student** with strong proficiency in **C++, Java, Python, Data Structures & Algorithms, and Full-Stack Web Development (HTML, CSS, JavaScript, PHP, MySQL)**. Experienced in building secure, scalable web and **Android applications** with real-time database integration and authentication using **Firebase**. Hands-on experience in **Machine Learning** model development and deployment using **Python and Streamlit**. Passionate about problem-solving, clean UI/UX design, and delivering efficient, high-quality software solutions.

EDUCATION

B.Tech in Computer Engineering	PCCOE, Pune	2024–2027	CGPA: 8.83
Diploma in Computer Technology	KIT Shelve-Pandharpur	2021-2024	Score: 95.09%
SSC	Shrimantrao Kale Vidyalaya	2020-2021	Score: 87%

EXPERIENCE

Android Development Intern – Dean FDW, PCCOE, Pune Jun 2025 – Jul 2025

Tech Stack: Kotlin, Firebase, Figma, Git, GitHub, Android Studio

- Designed and developed 2 Android applications using **Kotlin and Firebase**, integrating real-time database functionality and secure user authentication.
- Implemented **Firebase Authentication** and complete **CRUD operations** to ensure secure data management and seamless user experience.
- Designed responsive and intuitive UI screens using **Figma**, following **Android Material Design** principles.

PROJECTS

Student Admission System | HTML, CSS, JavaScript, PHP, MYSQL Mar 2024 – May 2024

- Developed a full-stack admission management system with **secure authentication** and **role-based access control (RBAC)**.
- Designed and optimized **database-driven workflows** for student registration, application tracking, and record management.
- Secured **1st Prize** at an inter-college project competition for innovation and implementation quality.

Cafeteria Management System | Bootstrap, PHP, MySQL, JavaScript Sep 2024 – Oct 2024

- Built a **web-based order and inventory management system** for **order processing, stock tracking, and billing automation**.
- Implemented **secure login authentication** and optimized **MySQL queries** to improve data retrieval speed and backend performance.

Marathi Sanskriti Connect | Web Application + AI Mar 2025 – Apr 2025

- Developed a cultural web platform to showcase Marathi traditions, events, culture, and heritage using modern web technologies.
- Integrated an **AI-powered chatbot** & community event-hosting features to enhance user engagement and interactivity.

Heart Disease Detection System | Machine Learning, Python, Streamlit July 2025 – Sep 2025

- Trained and evaluated **machine learning** models including **AdaBoost, Support Vector Machine (SVM), and Decision Trees** for heart disease prediction.
- Developed an interactive **Streamlit** web application for real-time prediction and data visualization based on user inputs.

SKILLS

Programming Languages:	C++, Java, Python, HTML, CSS, JavaScript
Databases:	MySQL, MongoDB
Machine Learning:	Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn
Core Concepts:	Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks, SDLC
Tools:	Git, GitHub, Android Studio, Figma, Eclipse, Firebase, XAMPP

CERTIFICATES

Data Structure using C++ - Simplilearn	April 2025
GenAI Data Analytics Simulation — TATA Forage	Sep 2025
Python Programming — Aspiring Careers, HackerRank	May 2025
Introduction to Generative AI — LinkedIn Learning	Sep 2025
